#### Abstract:

The existence of pesantrens in the Indonesian archipelago, such as Pondok Pesantren Miftahul Huda Manonjaya, Tasikmalaya is a major transformation for the development of the national education system. This present study aims at investigating the educational values based on the thinking of K.H. Choer Affandi and their relevance to the modern education. This study employed a qualitative approach and descriptive method. In this present study, the researcher acted as the main instrument. The data collection techniques employed in this study covered interviews, observation, and documentation studies. Based on the results of the study, it showed that K.H Choer Affandi was a salafiyah Islamic scholar born from a knowledgeable, fighter, and noble family. Coming from the aforementioned reason, he was eventually active in education realms and movements. Educational values of K.H. Choer Affandi consist of iman and taqwa values, leadership, independence, discipline, honesty, persistence (istiqomah), courage (syaja'ah), intelligence and simplicity values (tawadu) Therefore, the educational values of K.H. Choer Affandi is still relevant in modern education today, because modern education has lost its essential meaning, revoked from the roots of the values of education itself.

Keywords: Education Values, K.H. Choer Affandi, Modern Education, Pondok Pesantren Miftahul Huda

#### Introduction

The spread of Islam in the Indonesian archipelago cannot be separated from the role of the *Ulemas* (Islamic scholars) and pesantrens (Islamic training centers for advanced studies). It has been proven that pesantren, apart from being educational institutions and social institutions, also functioned as a *da'wah*  center, and a center of resistance to the colonialists.<sup>1</sup> Meanwhile, in the context of education in Indonesia, pesantren is a

<sup>&</sup>lt;sup>1</sup> S Haningsih, "Peran Strategis Pesantren, Madrasah Dan Sekolah Islam Di Indonesia," *Jurnal Pendidikan Islam: El Tarbawi* 1, no. 1 (2008): 27–39,

unique Indonesian education instrument.<sup>2</sup> The uniqueness and endurance of pesantren has always made it become an interesting and neverending research subject. The existence of pesantren has become an attraction in all its aspects, both its kiais (Islamic clerics) and its education system. That is what makes pesantren and everything related to it become a treasure of intellectual property and local wisdom.<sup>3</sup>

The term pesantren in the Indonesian archipelago has many similarities with education Islamic institutions in Southeast Asia. In Aceh it is known as dayah, in Minangkabau it is known as surau, while in Java it is called *pesantren*, in Malaysia it is called a *pondok*, and in Southern Thailand it is called *pho no*. Pesantren was first established in 840 AD by Teungku Chik Muhammad Amin in East Aceh that was known as *dayah*. As for the surau, it was first built by Shaykh Burhanuddin Ulakan (1646-1704 AD) in Pariaman after he learned from Aceh with Shaykh Abdurrauf al-Singkili (d. 1693 AD). Meanwhile in Java, pesantren was founded by Raden Fatah in 1475 AD in Jepara, Central Java.<sup>4</sup> By looking at the history of the establishment of pesantren, we can conclude that pesantren has made a huge contribution in building this country, especially at fostering Indonesia's human resources.

However, the contribution of the pesantren is in fact not aligned with the appreciation given by today's younger generation. The proof is that they apparently are not aware of the role of the *Ulemas* and pesantren in the Indonesian archipelago in general, and West Java in particular. They have no idea regarding the Ulemas who have contributed to building the country especially in the field of education. Meanwhile, the education concept that is applied in the Indonesian education system today mostly refers to the education concept from the western world. In other words, the concept of education that comes from pesantren figures is rarely used. Lack of knowledge about the role of *Ulemas* and pesantren in the educational realm causes parents and youth today deprecate the pesantren education system especially the salafiyah pesantrens.

Salafiyah pesantren is an educational institution that has spread throughout the country. Its simplicity, local wisdom, philosophy, and education concept are already ingrained in most of Indonesian especially in Islamic-based people, education. Indirectly and informally, character education has been strongly instilled in the education through salafiyah pesantren's system and techniques.<sup>5</sup> Meanwhile, the phenomena of globalization and modernization are contributing factors that change individuals', families' and society's

<sup>&</sup>lt;sup>4</sup> Ridhwan, Abidin Nurdin, and Sri Astuti A Samad, "Dynamics of Islamic Education in The Land of Bugis: Growth , Development and Typology Pesantren in Bone," *IOP Conference Series: Earth and Environmental Science*, 2018, 1–8.

<sup>&</sup>lt;sup>5</sup> Kamin Sumardi, "Potret Pendidikan Karakter Di Pondok Pesantren Salafiah," *Jurnal Pendidikan Karakter* 2, no. 3 (2012): 280–92, https://doi.org/10.21831/JPK.V0I3.1246.

values. The endless modernization, the development of the global world, and the overflow of negative culture have plagued many countries around the world including Indonesia. As a result, the rise of crime among teenagers becomes a problem that is no longer considered normal. Year by year, the number of juvenile crimes increases and shows a sad development.<sup>6</sup>

Various cases of juvenile crime, such as the rampant consumption of alcohols promiscuity, and drugs, pregnancy outside marriage, abortion, student brawls and many others, are evidence that today generation is experiencing a moral crisis.<sup>7</sup> These problems, of course, do not occur by themselves, but are caused by several factors; internal and external factors. First, the internal factors from the muslim ummaħ come themselves. The younger generation are still lacking the awareness of the history of the previous Ulemas' struggles, and it leads to a small number of literature and research carried out on pesantren leaders. Second, the external factors include the increasing flow of information and technology that make Muslims wonderstruck with the progress of the western world. As a result, they look down the pesantren education, while in fact its development and excellence have been proven especially in fostering noble characters.

Based on the aforementioned facts, the role of pesantren needs to be improved since the demand of globalization is inevitable. One prudent step to prevent pesantren from being defeated in the competitiveness is to prepare pesantren to be able to overcome the challenges of the times.<sup>8</sup> Therefore, an effort is required to solve the problem; or the educational process at the pesantren will be hampered. Gradually pesantren can go bankrupt because Muslims will no longer be interested, Therefore it is necessary to conduct a research to solve this problem. It is interesting to investigate the lack of literature and research—one of the many causes of the problem-that discuss the thoughts of pesantren leaders. Therefore, a research is needed to explore the educational values from pesantren leaders. In this case, the researcher is interested in conducting character studies to explore educational values of a legendary scholar from Tasikmalaya namely K.H. Choer Affandi.

The researcher is interested in exploring the education values that are not affected by the modern education system. Therefore, the researcher chose the salafiyah Ulema namely K.H. Choer of the Affandi as one carriers. Additionally, Tasikmalaya is one of the regions in West Java that is recognized as a religious city.<sup>9</sup> It also well known as the

city of santri.10 Based on the existing facts, Tasikmalaya has many formal and informal education institutions.<sup>11</sup> A lot of pesantren scattered there which function as the headquarters for the spread of Islam and Islamic *da'wah* (preaching) centers. One of the major pesantren in Tasikmalaya is Pesantren Miftahul Huda Manonjava with K.H. Choer Affandi as its legendary founder.<sup>12</sup> The researcher assumes, the thinking of K.H. Choer Affandi contributed to the educational values that are still relevant in modern education. То prove the author's assumption, therefore а research is needed to be conducted. From this point, the researcher entitled this study as Education Values Based on the Thinking of K.H. Choer Affandi And Their Relevance to the Modern Education (The Study Of The Legendary Islamic Scholar of Pondok Pondok Pesantren Miftahul Huda Manonjaya Tasikmalaya).

# Methods

This study employed a qualitative approach with a descriptive method. The researcher himself acted as the instrument. In data collection, the researcher used а descriptive and structural technique of interview to the family of K.H. Choer Affandi, students who have studied directly with him, and

the students of Pesantren Miftahul Huda Manonjaya. The researcher made a set of instrument of questions used in the interview then dug up information and other data using the interview guidelines. In this study, observation techniques was employed at the Pondok Pesantren Miftahul Huda Manonjaya Tasikmalaya. In addition, the researcher complemented with a documentation study by looking for theoretical references that are relevant to the problems discussed and research theme in the form of K.H. Choer Affandi's Kitābs (books), books, journals, seminar results, and discussions with experts. The data that had been obtained were then thoroughly analyzed with a descriptive analysis methods, namely data reduction, data display, data coding, and conclusion drawing. To test the validity and reliability of the data, the researcher extended the research bv adding references, triangulation, member check, and being attentive in analysing the data. Results

# Biography

Choer Affandi was born on Monday, September 12, 1923 AD, in Palumbungan, Cigugur Village, Cigugur District of Ciamis Regency. He is the son of Raden Mas Abdullah bin Hasan Ruba' – who is the descendant of the King of Mataram – and Siti Aminah binti Marhalan, the descendant of the Wali Godog Garut. Choer Affandi is the second child of three siblings. He had an older brother named Husein (Darajat), and a younger sister named Husnah (Emih).<sup>13</sup> Choer Affandi had the aristocratic and *Ulema* descendants running in his blood which were certainly very dominant in shaping

his personality. It can be seen from his attitude that was very keen on studying religion and science.<sup>14</sup>

# The Learning Period of K.H. Choer Affandi

Choer Affandi's father was a Dutch employee that it caused his grandmother Haesusi concerned him greatly. Therefore, after he completed his general education at HIS (Hollandcsh Inlandsche School) in 1936 AD, his grandmother persuaded Choer Affandi to learn Islam at K.H. Abdul Hamid's pesantren. In the pesantren, Onong Husen (Choer Affandi's name as a child) learnt Islam intensively for six months. Afterwards, he returned to Cigugur and learn Islam at the Pesantren Cipancur Cigugur. After study finished, he the went to Sukamanah, specifically to K.H. Zainal Mustafa's pesantren to continue learning. When Onong learnt Islam at the Pesantren Sukamanah, he was included as a santri who was required to follow a senior santri named H Masluh. H. Masluh was a santri that stayed, or had received the approval of K.H. Zainal Mustafa to establish a pesantren. With all his compliance and obedience to the teacher, Onong departed from the previous pesantren with his friends to follow H. Masluh. The new pesantren established by H. Masluh was named Legok Ringgit, and in this pesantren, little Onong registered himself as Choer Affandi. The Pesantren Legok Ringgit was in the east of the Pesantren Sukamanah, located approximately 500 meters away.15

H. Masluh also adopted Choer Affandi as his son along with other santri such as Sadili and Jahuri from Karawang, Rois from Bogor, and Ruhiyat from Tasikmalaya. Not only that, Choer Affandi's respect to his teacher was also shown when he was instructed to learn Islam in the Pesantren Pani'is, led by K.H. Shobir in 1940 AD, that was located in the village of Cigadog Leuwisari. He spent six months there to study Usul Figh. After finished studying at the Pesantren Pani'is, he returned to Legok Ringgit. After that, he was instructed to learn Islam at the pesantren Tunagan led Dimyati bv K.H. in Tasikmalaya, specifically to study astronomy, which comprised in the book of Taqrībul Magsod. After that, he returned to Pesantren Legok Ringgit.<sup>16</sup>

After returning from Pesantren Tunagan, precisely in 1941 AD, Choer Affandi was then instructed to learn the science of *hisab* (the science of reckoning, arithmetic) or *falaq* at Pesantren Jembatan Lima Jakarta, led by K.H. Mansur, until December 1941 AD. After he finished, he did not go straight to Pesantren Legok Ringgit, instead, he went to pesantren Syamsul Ulum Gunung Puyuh in Sukabumi to learn the science of faraid (Islamic inheritance law) from K.H. Mahfudz, and continued his jouney to pesantren Tipar, which is still around Sukabumi, to study the science of *Tafsir* (interpretation). All of his journeys were carried out due to the teacher's orders. After returning from Sukabumi in March 1942 AD, he asked H. Masluh for consideration to establish a pesantren in his native area, namely in Cigugur. In the same year, he also established pesantren Wanasuka in his area. Even though Choer Affandi had become a leader, or

<sup>&</sup>lt;sup>14</sup> Aliyun Murtado, "Biografi Dan Pemikiran KH. Choer Affandi Dalam Dunia Pendidikan" (2015).

<sup>&</sup>lt;sup>15</sup> Abdul Fattah, Uwa Ajengan (Ciamis: Galuh Nurani, 2013), 6-7.

<sup>&</sup>lt;sup>16</sup> Abdul Fattah, Uwa Ajengan (Ciamis: Galuh Nurani, 2013), 8.

already had a pesantren that is quite large, he still had a burning desire to study and seek more religious knowledge by seeing Kiai Abdul Hamid and K.H. Didi Abdul Majid once a week to learn. Due to his perseverance and intelligence, he finally he became the representative of the two *ulemas* in giving lectures to the *mustami'* who attended the lessons.<sup>17</sup>

# The History of The Establishment of Pesantren Miftahul Huda Manonjaya

The history of the establishment of Pesantren Miftahul Huda Manonjaya began with the experience of K.H. Choer Affandi dealing with Political Islam. It began when he was signing at Pesantren Sukamanah (led by K.H. Zainal Mustafa), and Pesantren Gunung Puyuh (led by K.H. Ahmad Sanusi). In those two pesantrens, he was taught Rūh al-Jihād to the fundamentals of *tawhid* by his teachers since he began to study Kitāb al-*Jurūmiyah*. The spirit of *jihād* also emerged when he heard the inhumane treatment of the Japanese army against his teacher K.H. Zainal Mustafa when there was a rebellion from the Pesantren Sukamanah. Although he was not directly involved in the rebellion, Japanese army suspected him and tried to arrest him but he was able to evade from the raids. The teachings of his teachers and their anti-colonial movements were very powerful in influencing K.H. Choer Affandi, so it fostered the spirit of rebellion and the ideological Islamic State.<sup>18</sup>

It was this anti-colonial spirit that pushed K.H. Choer Affandi to join Hizbullah, the military wing that was filled by kiais and santris that used to fight the Dutch at the time of the Netherlands-Indies Civil Administration (NICA) and the Netherlands sought to recolonize Indonesia. After the Renville Agreement (January 17, 1948), most of Indonesia's territory including Java was claimed to be part of the Netherlands. The center of Indonesian government is then moved to Yogyakarta. All Republic of Indonesia (RI) military forces and paramilitary factions were commanded to have a long march to Yogyakarta, causing West Java to experience a leadership vacuum. At that time, Darul Islam / Tentara Islam Indonesia (Islamic Armed Forces of Indonesia, known as DI revolutionary TII) / movement strengthened several regions in especially in West Java. One of which insisted on maintaining Indonesian territories from British and Dutch troops. They launched guerrilla attack in the areas left by the Indonesian military forces.<sup>19</sup>

After the Round Table Conference (KMB) on December 27, 1949, most of Java areas was claimed again as part of Indonesia and the Central Government in Jakarta requested DI / TII to merge into the Republic of Indonesia Military Forces (TRI). Some DI / TII members refused to restore the territories they had controlled to the Central Government. Then there a war broke out between DI / TII and the Indonesian Army (TNI) that lasted from 1949-1962. At that time, K.H. Choer Affandi was one of the DI / TII

officials who is quite close to Kartosuwiryo because he was one of the alumni of the Suffah Institute. When DI / TII "lost the war", K.H. Choer Affandi decided to show up in 1962, when the operation of the People's Joint Forces Combating Islamic Army (Pagar Betis) was underway under the command of A.H. Nasution. He surrendered to the Government of Indonesia. He was accepted and received good treatment from the Government of Indonesia. Even when he did not show up, he was still listed as an active soldier and still being paid by the government.<sup>20</sup>

After he showed up and got involved again, his method of struggle changed to the field of education by establishing pesantren.<sup>21</sup> Meanwhile, according to several sources of information, the return of K.H. Choer Affandi to the Manonjava area was due to he followed the advice given by his teacher, besides the *mustami* or alumni who had attended courses at Pesantren Wanasuka.<sup>22</sup> Initially this pesantren was located in the middle of Gobong Sari of Cisitukaler Village, about 1 kilometer southwest of the current location. At that time, the pesantren only had a madrasa and two dormitories for male and female santris since there was no vacant land available to build another dormitory. The situation made K.H. Choer Affandi unable to monitor his

students from external influences. Therefore, on a teacher's advice namely K.H. Raden Didi Abdul Majid, K.H. Choer Affandi chose the current location. Previously, he was offered to set up 3 pesantren by benefactors, but after *istikharah* prayer, he decided to choose the present location.<sup>23</sup>

Pesantren Miftahul Huda was established on August 7, 1967 by K.H. Choer Affandi.<sup>24</sup> Since its establishment in 1967, Pesantren Miftahul Huda has had a socio-religious impact on the Manonjaya community in Tasikmalaya. This is what makes Pesantren Miftahul Huda become the center of Islamic development in the Manonjaya region today. It can be seen from the various socio-religious activities that have been carried out since the establishment of the pesantren up to this time.<sup>25</sup> Along with its development, currently Pesantren Miftahul Huda Manonjaya has become the largest salafiyah pesantren in West Java. Pesantren Miftahul Huda has three important roles, namely as an Islamic education institution, human resource development, and community development.<sup>26</sup> What makes the pesantren interesting and unique is the communication management strategy, which is applied in the development of human resources, that is called the

# Successors of K.H. Choer Affandi's Struggle

K.H. Choer Affandi died at 9:30 p.m. on Friday, November 26, 1994 at Hasan Hospital, Bandung.<sup>28</sup> Sadikin His struggle in developing the pesantren was then continued by his descendants. Among his descendants, some became the council Kiais of Anwar Muda, an organization consisting of the sons, daughters, and grandchildren of the founder of Pesantren Miftahul Huda.29 According to his closest people, it can be understood that, he was a figure of murabbi, muhajjir and mujāhid. He is a legendary Ulema figure who educated his students with maximum effort. To instill discipline he educated his *santri* strictly as if in a military camp, but at the same time he was gentle with his family. K.H. Choer Affandi undoubtly prioritized his santris' affairs than his family. He is a person who is able to transfer *ghiroh* (the sense of honour) to guard the Ruhūl al-*Jihad,* so that it is instilled in his family's and students' selves.<sup>30</sup>

### Foundation of Thinking

After showing up from his concealment, he assessed the reality of the problem as an '*Aqīdah* matter. He chose *tawhīd* as the subject of his teachings where the Qur'an and Sunnah function as the basis of thinking.<sup>31</sup> The basis used by the source in the science of *tawhīd* is *dalil 'aqly* (the guidance of the *ghorīzi* mind) and *dalil naqly* (the guidance of the Qur'an and Hadis).<sup>32</sup>

## **Education Principles**

The principle of his education is tawhid, which means truly believing in His Messenger, and 'Aqīdah Allah, *Sam'iyyaħ*. Therefore, he wrote many books about *tawhid* that included the main Kitābs such as; Natsar, Majmu'atul Aqīdah, Talwih Tijan, 'Aqidah Islāmiyyaħ and many others. The principles of his education are comprised in the 'Aqidah Islāmiyyah Kitāb called mabadi. Anyone who would like to seek knowledge, including ʻilm at-tawhīd (tawhīd knowledge), he or she needs to be familiar with the 10 kinds of mabadi such as:

### **Education Objectives**

His education objectives is to enable the society to practice Islam in a *kaffāħ* way (comprehensively) through the path of *ma'rifaħ* to Allah. The *ma'rifaħ* to Allah will lead to purity, the purity of the soul will lead to good deeds, good deeds can be *kifaraħ* against sin. Thus, the believers should try to make themselves reach *ma'rifah* in order to gain the peace of soul and avoid hopelessness.<sup>34</sup> As for the implementation in pesantren, the goal he initiated were listed in the *Tri Program* 

<sup>&</sup>lt;sup>33</sup> Affandi, 'Aqidah Islamiyyah. Tasikmalaya. (Tasikmalaya: Yayasan Pesantren Miftahul Huda, 2012), 2-4.

<sup>&</sup>lt;sup>34</sup> Affandi, Mutiara Hikmah Jalan Pikeun Ngahontal Darajat Kawalian (Tasikmalaya: Yayasan Pesantren Miftahul Huda, 2012), 22.

*Pesantren,* namely '*Ulamaul' Amilīn, Immāmal Muttaqin* and *Muttaqin*.

# Teaching and Learning Concept

His teaching and learning concept are strict like in the military. Every time he lectured, there must always be someone who took notes. On one occasion, he wanted a change in the learning system at the pesantren, so he visited many pesantrens througout Java to conduct comparative studies to decide the right breakthrough in carrying out the learning activities.<sup>35</sup> He taught *da'wah* with the concept of deeds, so that he had a well-respected or authoritative bearing, and became a good example. There was an interesting story about his wellrespected bearing. Once, the students in the dormitory were noisy, so he walked using walking around his stick, immediately the students went silent when they heard the sound of his steps and his walking stick. He did not say anything, but only with the sound of his steps and his walking stick he could hush the noisy santris. This indicates that, the educational communication effectively occurred between kiai and santris even though there was no single word spoken.<sup>36</sup>

As for the teaching and learning concepts of *Uwa Ajengan* (another name of K.H. Choer Affandi) in his education are known as  $ta'l\bar{l}m$ , tafwid and tawasul. Those are knowledge that will be obtained in daily  $ta'l\bar{l}m$ . As for abstract science, it will be obtained outside of  $ta'l\bar{l}m$ , such as ta'zim to knowledge and teachers, khidmaħ to teachers and pesantren. The examples of khidmah to the teachers are helping out the teacher's work, either staying in the teacher's house, or helping the teacher's everyday work, such as in business, farming, and so on. The same with *khidmah* to pesantren, the students should dedicate to the pesantren by teaching beginner participating students, in building pesantren, helping the pesantren business, and so on. 37

Tafwid is an ijab qabul (offering and acceptance) when the parents commend their children to the teachers so that the children are taught to be pious and agree with the rules given by the teacher. Thus when a santri would like to be Uwa Ajengan's student, he must be aware of the rules made at Pesantren Miftahul Huda. In contrast, at the time of new students admission in modern education today, the *ijab* and *qabul* between teachers and students do not exist. Pesantren Miftahul Huda Manonjaya, however, still maintains the *ijab qabul* tradition between parents, kiais and santri up until now. When there is a new santri, the santri's parents will usually see kiai and commend their children, so that there will be agreements between parents, kiai and santri. The implication is that there will be compliance between the parents, kiais and santris on the learning process in the pesantren. As for *tawasul*, it means looking for *wasilah* so that Allah will make ease in the seeking of knowledge. It can be in the form of prayer, khidmah to the teacher and pesantren, or in the form other sunnah practices.38

<sup>&</sup>lt;sup>35</sup> Abdul Fattah, *Uwa Ajengan* (Ciamis: Glauh Nurani, 2013), 7-9.

<sup>&</sup>lt;sup>36</sup> Syahidin, Komunikasi Kyai-Santri Di Pondok Pesantren Miftahul Huda Manonjaya (Tesis) (Bandung: Program Pascasarjana Universitas Pendidikan Indonesia, 1994).

<sup>&</sup>lt;sup>37</sup> Ilham Qodari, "Biografi KH. Choer Affandi" (2015).

<sup>&</sup>lt;sup>38</sup> Ilham Qodari, "Biografi KH. Choer Affandi" (2015).

K.H. Choer Affandi was a skillful writer, he had wrote a number of papers, and most of them are written in the form of nazm. His works which had been inventoried were as follows: 1) 50 'Aaīdah' Ajāmin Mu'min Munjin; 2) 'Aqīdah Islāmiyyah; 3) Asrār Asmā al-Husnā; 4) Complete Outline of al-Asmā al-Husnā;5) Nazaman Sunda Syahadatain & Kalimah Toyyibah; 6) Nazm Istighāšah; 7) Nazm Sunda Hidāyat al-Atqiyā'; 8) Nazm Sunda Majmū'āt al-'Aqīdah Juz Awwal; 9) Nazm Sunda Majmū'āt al-'Aqīdah Juz al-Tāniy; 10) Nazm Sunda Safīnat al-Najāh; 11) Pangajaran Aqā'id al-Īmān; 12) Sunda Qiyāsan; 13) Tarjamah Kitab Bainamā (Sejarah Isra Mi'raj); 14) Tarjamah Sunda Bacaan Salat Fardlu; and 15) Tawdih Tijān al-Durāry.<sup>39</sup>

# **Education Curriculum**

The curriculum that is used is similar to the salafiyyah education system in general. It does not apply levels, curriculum, syllabus, and evaluation systems. Therefore students could learn without time limit that some students choose to study for years or even decades. However, in Pesantren Salafiyyah Miftahul Huda, K.H. Choer Affandi had been trying for a long time developing the salafiyyah system into a semi-formal system by providing leves, syllabus, learning curriculum, and an evaluation system based on the goals and objectives of learning. The level of education in Pesantren Miftahul Huda is basically divided into three, namely Ibtida, Sanawi, Ma'had Ali. All of them have three sublevels. Hovewer, at level two and three at the level of *Ma*'had Ali. the activity is emphasized on teaching practice and managing organizations.<sup>40</sup> **Educational Materials** 

The educational materials that he taught consisted of 12 disciplines (*fan*). He studied the 12 disciplines and taught them in the materials he delivered, including *Tawhīd*, *Fiqh*, *Alat*, *Tafsir*, *Asmā al-Husna*, *Suluk* / *Falak*, *Ruhūl Jihad*, *Farāiḍ* and *Tajwīd Sciences*.<sup>41</sup> There is also a special characteristic in the material which he always instilled in every lesson, and all branches of Pesantren Miftahul Huda Islamic are also always chanting *nażam kalimaħ toyyibaħ* as follows:

لَا اِلَه اِلَّا الله لَامَوْجُوْدَ اِلَّا الله لَا اِلَه اِلَّا الله لَامَعْبُوْدَ اِلَّا الله لَا اِلَه اِلَّا الله لَا مَطْلُوْبَ اِلَّا الله لَا اِلَه اِلَّا الله لَا مَقْصُوْدَ اِلَّا الله إِسْمِ الله تَوَكَلْنَا عَلَى الله لَاحَوْلَ وَلَاقُوَّةَ اِلَّا بِالله أَسْتَغْفِرُ الله الْعَظِيْم وَٱتُوْبُ اِلَيْه

As for the history of the emergence of the *kalimaħ toyyibaħ* actually came from several K.H Choer Affandi's teachers namely:

- a. K.H. Raden Didi Abdul Majid, Pesantren Kalangsari, Cijulang, Ciamis. It is interesting that in fact he was only a weekly expert on *riyādoħ*, but he was engaged to be his assistant.
- b. Syekh Jalal Sayuti, Gerenggeum, Kebumen, Central Java. In his method of learning, he used the *suluk bidayah* way. *Uwa Ajengan* was immediately trained in *riyādoħ*. He then

<sup>&</sup>lt;sup>39</sup> Sulasman, "Peasceful Jihad Dan Pendidikan Deradikalisasi Agama," *Walisongo* 23, no. 1 (2015): 151–76.

<sup>&</sup>lt;sup>40</sup> Abdul Fattah, *Uwa Ajengan* (Ciamis: Glauh Nurani, 2013), 31-32.
<sup>41</sup> *ibid.*, 68.

understood that after being trained by his teacher, he received a diploma in the form of *kalimaħ toyyibaħ Lāilāha illallah Lā Maujūda Illallah*. That is to say, *I am here, as now, with the power of Allah. Uwa Ajengan* understood that every time that is passed will be reckoned and accounted for before Allah.

- c. After that, the *murabbi* did his *riyādoh* practice, while reading again the *Sundanese* poetry, *Uwa Ajengan* lived up to the meaning and finally the covering was reopened, realizing that trading is not only to gain profit, but also to aim Allah's *rida*. *Uwa Ajengan* finally understood that the poem was the *kalimah toyyibah* diploma *Lāilāha Illallah Lā Maqsūda Illallah*. As a result, from Syekh Jalal Suyuți, he received two *kalimah toyyibah*.
- d. K.H. Sekarmaji educated Uwa Ajengan for approximately 100 days, training riyādoħ and was only allowed him to wear all-white clothes. From the top to the trousers, it had to be white. It was the most remarkable moment where Uwa Ajengan was guided by kalimaħ toyyibaħ . And plus two kalimaħ toyyibaħ , Lāilāha Illallah Lā Matlūba Illallah and Lāilāha Illallah Lā Matlūba Illallah. So from all of his murobbis, four sentences of kalimaħ toyyibaħ were received.<sup>42</sup>

The following are some books that are studied at Pesantren Miftahul Huda:

# **Education Method**

The education method that K.H. Choer Affandi usually used in the salafiyyah learning process is the dialogues, method, such lectures, as sorogan, bandongan, classes (classical), reciting (*mutāla'ah*), and mużakarah,

memorizing (*muhāfażah*).<sup>43</sup> In memorizing various books, he used several poetry and *naẓam* tones, so that the book could be easily memorized.

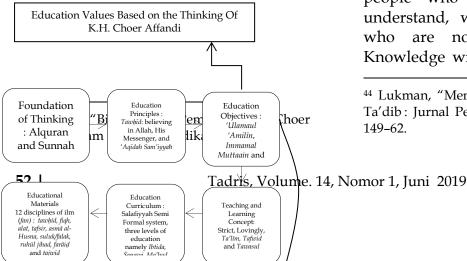

### **Education Media**

In the learning process, K.H. Choer Affandi used the yellow book (Kitab blackboards. Kuning), chalks, and loudspeakers, since at that time there were no sophisticated electronic devices. In instilling his educational values to his he used students, natural and environmental media. For instance, he taught skills in agriculture, fisheries, farming, building, and others.

#### **Education Evaluation**

In conducting evaluation, he usually performs oral and written test techniques. Book reading along with its understanding is usually used as an indicator for students to continue their next education. As for the santris who would like to stay, he evaluated them in person in terms of the book comprehension test and his mental readiness in serving the community. Based on the above findings, a chart can be made as follows :

#### Chart 1 Education Values Based on the Thinking Of K.H. Choer Affandi

### Discussion

# The Relevance of K.H. Choer Affandi's Education Values to Modern Education

The aforementioned K.H Choer Affandi's educational values are still relevant to today's modern education context. Modern education has lost its essential meaning, which is strained from the basis of the values of the education itself. At present, the material-oriented education has proven to fail the students to become the nation's leaders. Many students' learning orientation is only to find a job.<sup>44</sup> The purpose of education is to make students who are faithful, taqwa, and have an Islamic personality, whose mindset and attitude are also Islamic. However, in reality, modern education is far from its essential meaning. Therefore, it is necessary to improve *adab* (manner) values, so that science must go hand in hand with adab. Knowledge guides people who do not understand to understand, while adab guides people are not pious to be pious. who Knowledge without adab is not enough.

<sup>&</sup>lt;sup>44</sup> Lukman, "Menuju Sistem Pendidikan Islam," Ta'dib: Jurnal Pendidikan Islam 2, no. 2 (2002): 149–62.

And vice versa; *adab* without knowledge is not enough.

In the education process, all students basically have two rights, namelv knowledge and adab. The transfer of knowledge occurs in the process of book translating by the teacher, then it is delivered in classes. In contrast, adab needs to be instilled and comprehended. It is obtained from the piety exemplified by the teacher. From this point, the knowledge of *tawhīd* and adab must underlie modern education, in terms of principles, objectives, curriculum, materials. methods, media and educational evaluation. Modern education is far from *adab* values, both adab to teachers and adab to knowlede. It is important for students to understand adab to the teachers and knowledge because they are always in line. Knowledge can be obtained in class, but adab, besides being studied, the teacher must also be an example for his students to follow. Therefore there must be a synergy in the *tawhid* education, *adab*, and knowledge. The aforementioned synergy is comprised in the thoughts of K.H. Choer Affandi.

K.H. Choer Affandi is a legendary Ulema figure who possessed a lot of *karomah* which is not possessed by humans in general.<sup>45</sup> He is a 'Ulamaul 'Amīlin, who teaches santris so that they can become *kiais*. His target is to mold *Ulemas* who practice knowledge (Ulamaul 'Amīlin), the leader of the righteous (Imāmal Muttaqin), and become a person of taqwa for himself (Muttaqin). He taught santri with patience, tawakal, and hilim, the characters that the Rasul Allah Salla Allah 'Alaihi Wa Sallam had.<sup>46</sup> In his method of *da*'*wah*, he carried out *da*'*wah bil hal* and *dakwah bil lisan*, by giving example to the *muslim ummaħ* about Islamic life.

*Kiai* is the most important person (key person) and determinant figure in the development and management of a pesantren. A kiai is required to be able or be expert in implementing leadership strategies for the sake of the pesantren progress that he leads.<sup>47</sup> It is due to leaders are catalysts who are able to think realistically and practically, and needed in an organization.<sup>48</sup> Islamic education in pesantren has a long history in developing the national education system in Indonesia.49 Pesantren with its main elements namely kiais, santris, mosques, pondok and kitab kuning make pesantren have their own sub-cultures. Therefore, despite modernization and globalization, pesantren still survive up until now.50 K.H. Choer Affandi has succeeded in becoming a key role in the kiai leadership and the management of

<sup>&</sup>lt;sup>45</sup> Riki Saepurrohman, "Pandangan Terhadap KH. Choer Affandi" (2015).

the pesantren. This is the reason why the pesantren that he founded can survive that his students even open new branches.

His goals were establish to а pesantren to educate the people based on faith and *taqwa*, make them financially independent and posessing life skills. Therefore, besides studying the kitab kuning, he taught his students to have life skills, such as in agriculture, fisheries, farming, building construction, and several other skills. In the learning process, he emphasized in the aspects of Aqidah and Figh. The santris were also trained to lead an organization and khidmah to the kiai, the proof was that there were some senior santris who were trained to be *kiai* guards.

It seems that the Islamic education curriculum that is well-implemented in the education system applied by K.H. Affandi will help produce Choer individuals who have balance to lead a more dynamic and progressive spiritual, generation in terms of and intellectual, physical emotional aspects.<sup>51</sup> Pesantren as part of the education system in Indonesia does not only teach religious knowledge, but also encourages students to take part in advancing the world.<sup>52</sup> Therefore, it can be said that Pesantren Miftahul Huda Islamic has contributed to the progress of the world as this pesantren teaches Arabic and English (even though the allocation time for English learning is limited).

As for the education method that he used, usually the senior students did the *sorogan* (*kitāb* reading) in person with him, while *bandongan* is usually carried out every *ba'da subh* (after dawn). The activity is followed by all students, both beginners and seniors. This is interesting that it he put forward the value of *barakah* or blessing in learning, because all students who attend the course, from the beginners to seniors, can directly learn with him. The chanting of *nażam* and poetry always adorned each lesson; when they started learning and finished learning.

Over the past century, there have been criticisms targeted at methodologies related to the teaching and learning of Islamic studies. It is especially against the failure in responding to the challenges brought about by contemporary needs of the modern world.53 However, despite the challenges of the modern world, in fact it does not threat the methodology of studies in pesantrens that Islamic maintain kitāb and sanad. To prove this, it can be seen that the education methods exemplified by K.H. Choer Affandi to his students still continue to be practiced until now. He has been quite successful in educating his students.

The learning media he used at the time were the *kitab kuning*, blackboards, loudspeakers. chalks and Most importantly, established his he educational values through natural and environmental media. The strategy provide developed by pesantren to

<sup>&</sup>lt;sup>51</sup> Maimun Aqsha Lubis et al., "Systematic Steps in Teaching and Learning Islamic Education in the Classroom," *Procedia - Social and Behavioral Sciences* 7, no. 2 (2010): 665–70, https://doi.org/10.1016/j.sbspro.2010.10.090.
<sup>52</sup> Muhammad Yusuf and Ismail Suardi Wekke, "Active Learning on Teaching Arabic for Special Purpose in Indonesian Pesantren," *Procedia -Social and Behavioral Sciences* 191 (2015): 137–41, https://doi.org/10.1016/j.sbspro.2015.04.245.

<sup>&</sup>lt;sup>53</sup> Muhamad Faisal Ashaari et al., "An Assessment of Teaching and Learning Methodology in Islamic Studies," *Procedia - Social and Behavioral Sciences* 59 (2012): 618–26, https://doi.org/10.1016/j.sbspro.2012.09.322.

environmental awareness is to care for the environment. In addition, to raise students' collective awareness several daily activities is carried out such as cleaning the dormitory, the *pondok* and environment, disposing garbage, activities.54 other collective As for instilling the values of independence, through the environment in Pesantren Miftahul Huda, the santri are trained in to master life skills such as farming, keeping livestock, fish farming, construction and so on.

The education evaluation that he did is by having the students read the kitāb that have been studied before. If the students could read the kitāb and understand it, he could continue to the next level. As for santris who want to settle in the pesantren they would be tested directly by him. The mukim (settling) tradition is an interesting way in the mission of spreading Islam. If the santri is deemed qualified, and passed in the learning process at the pesantren, the santri will be resettled to certain areas to serve the local community. Usually in the tradition of *mukim*, he took part in delivering the students, because usually there was a tasyakur with the local community, so he usually left a message to the local community leaders that the santri were learning to serve and preach. So that he expect the local community pay attention to the santris economic needs.

Based on the explanation above it can be concluded that the values of education based on the thinking of K.H. Choer Affandi, consist of the values of *iman*  (faith) and taqwa (piety), the value of independence, leadership, discipline, honesty, perseverance (istiqomah), courage (syaja'ah), intelligence and simplicity (tawadu). All values that are roofed by the values of faith and piety will result tawadu. In its implementation, instilling his educational values cannot be done through regular teaching. It requires a long and gradual process through various approaches to the realization of attitude. Therefore, the existing educational values - which is one of them is the value of independence emphasizes more on the processes of understanding, comprehension, awareness and habituation.55

The implication is that the values of faith and piety must be maintained and cover other educational values. The process of instilling educational values needs to be underlay by essential values as the basic character of human being that are honest, independent, and knowledgeable. Then the matter of discipline needs to be emphasized because it is related to work ethic. Meanwhile, the era of globalization has seen a world without borders, where the role of teachers is becoming more challenging, the teachers require great patience and responsibility.56 Therefore, modern education loses an exemplary figure and requires ones, like a kiai who becomes a figure for his students. For teachers who want to be idolized by their students, the key lies in becoming their good example. On the other hand, it is

<sup>&</sup>lt;sup>54</sup> Jumarddin La Fua et al., "Islamic Education on Formation of Environmental Awareness in Pondok Pesantren Indonesia," *IOP Conference Series : Earth and Environmental Science*, 2018, 1–4.

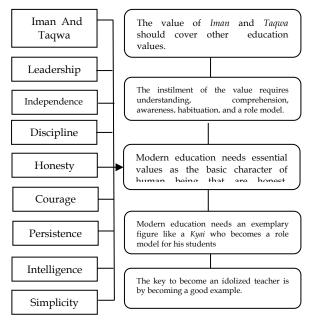

<sup>&</sup>lt;sup>55</sup> Sri Wahyuni Tanshzil, "Model Pembinaan Pendidikan Karakter Pada Lingkungan Pondok Pesantren Dalam Membangun Kemandirian Dan Disiplin Santri," *Jurnal Penelitian Pendidikan* 13, no. 2 (2012): 1–18.

<sup>&</sup>lt;sup>56</sup> Jaafar et al., "The Importance of Self-Efficacy: A Need for Islamic Teachers as Murabbi."

important for teachers to love their students, because students are Allah's mandate, so even in the learning process, it needs to be based on love, not on the basis of mere materiality.

Based on the explanation above, a chart can be made as follows:

#### Chart 2 The Relevance of K.H. Choer Affandi's Education Values to Modern Education

# Conclusion

K.H. Choer Affandi was born on Monday, September 12, 1923 in Kampung Palumbungan, Cigugur Cigugur Village, District, Ciamis Regency. He is the son of Raden Mas Abdullah bin Hasan Ruba'i (who still has the descendants of the King of Mataram) with Siti Aminah bint Marhalan (descendants from the Godog Mayor of Garut). Since he had the descendant of the king of Mataram and descendants of nobility, there were two things important in his way of life; education and movement. K.H. Choer Affandi died at 9:30 p.m. on Friday, November 26, 1994 at Hasan Sadikin Hospital, Bandung.

The foundation of his thinking is the Qur'an and Sunnah. The principle of education is *tawhid*. The aim of his education is to make people practice Islam in a *kaffāħ* way, through the way of ma'rifah to Allah. In its implementation in pesantren, it is included in the Tri Program Pesantren namely Ulamaul 'Amilin, Immāmal Muttagin and Muttagin. The concept of teaching and learning is strict like in the military camp, at the same time, he is also a loving person. The education curriculum is Semi Formal taught Salafiyah. The material he consisted of 12 disciplines (fan) including in Tawhīd, Figh, Alat, Tafsir, Asma al-Husna, Suluk / Falak, Ruhūl al-Jihad, Faroid and Tajwid. His education method is salafiyyah method, namely lectures, dialogues, sorogan, bandongan, classes mużakarah, (classical), repeating (*muțāla'ah*), memorizing (muhāfażah), nażam and poetry. The educational media are kitāb kuning, blackboards, chalks and instilling loudspeakers. In his educational values he used natural and environmental media.

Educational values of K.H. Choer Affandi consist of iman and taqwa values, independence, leadership, discipline, honesty, persistence (istigomah), courage intelligence and simplicity (syaja'ah), values (tawadu) Therefore, the educational values of K.H. Choer Affandi is still relevant in modern education today, because modern education has lost its essential meaning, revoked from the roots of the values of education itself. The implication is that the values of faith and piety must continue to be instilled and must be maintained in modern education. The process of instilling educational values needs to be underlay by essential values as the basic character of human being that are honest, independent, and knowledgeable. Since the modern education has lost the exemplary figure, therefore it urgently requires ones, such as a *kiai* that becomes the role model to his students.
